

Compliance Certificate

BeSoftware N.V.

This is to confirm that iTech Labs has examined the casino game logs in the gaming system of **BeSoftware N.V.** for the quarter ending June 2018 as recorded by the respective game servers. iTech Labs has calculated the Return To Player (RTP) for all the games using the data from the game logs. The table below lists the actual calculated RTPs for real money games played.

BeSoftware N.V. game servers service the following internet gaming sites:

www.allstarslots.com, www.aladdinsgoldcasino.com, www.buzzluck.com, www.clubsacacino.com,
www.clubworldcasinos.com, www.highnooncasino.com, www.luckyredcasino.com, www.manhattanslots.com

Game Type Description	RTP
Vegas Three Card Rummy	99.50%
Baccarat	99.34%
Texas Hold'em Bonus Poker	98.72%
Tri-Card Poker	98.31%
BlackJack	98.19%
Roulette	98.13%
Craps	97.76%
Caribbean Hold'em	97.62%
War	97.17%
Video Poker	97.02%
MultiHand Video Poker	96.92%
Roulette Multiplayer	96.85%
Scratch Cards	96.16%
Caribbean Draw	95.85%
Pai Gow Poker	95.56%
Keno	95.08%
Real-Series Video Slots	94.47%
Let Em Ride	93.75%
Caribbean Stud	90.07%
Slots ¹	89.02%
Other games combined*	89.94%
All games combined	95.59%

* Other games combined - includes Sic Bo, European Slot Poker, Red Dog and Bingo games

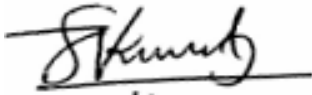

There were a large enough number of game records to give the RTP calculations sufficient statistical power². The actual RTPs shown above are percentages of total actual winnings to bets for each game type. iTech Labs has done checks to verify the integrity of the game logs. iTech Labs also maintains a copy of the game logs for verification purposes.

iTech Labs certifies that the RTPs were calculated correctly from the game logs based on the actual bets and winnings and that the actual RTPs are greater than normally required by international gaming jurisdictions.

¹Slots RTP result of 89.02% appears to be lower than expected for the number of games played (500,000) based on 95% confidence limits and estimates of RTP and standard deviation of the slot game pays. A 95% confidence limit would expect 1 in 20 results outside its predicted limits without indicating any fault. We recommend reviewing this result in the next period, and if still low, separating each of the games to see if one is performing out of limits.

² The games included in the Other games combined category have insufficient data for the audit period.

Compliance Certificate

BeSoftware N.V.

This is to confirm that iTech Labs has examined the casino game logs in the gaming system of **BeSoftware N.V.** for the month of May 2018 as recorded by the respective game servers. iTech Labs has calculated the Return To Player (RTP) for all the games using the data from the game logs. The table below lists the actual calculated RTPs for real money games played.

BeSoftware N.V. game servers service the following internet gaming sites:

www.allstarslots.com, www.aladdinsgoldcasino.com, www.buzzluck.com, www.clubworldcasinos.com,
www.highnooncasino.com, www.luckyredcasino.com, www.manhattanslots.com

Game Type Description	RTP
Keno ¹	106.25%
Baccarat ²	100.04%
Tri-Card Poker	99.62%
Texas Hold'em Bonus Poker™	99.45%
Craps	98.78%
Blacjack	97.93%
Video Poker	96.94%
Roulette	96.52%
Scratch Cards	96.20%
Caribbean Hold'em	95.85%
MultiHand Video Poker	95.47%
Real-Series Video Slots	94.29%
Let Em Ride	93.22%
Slots ²	89.54%
Other games combined*	94.04%
All games combined	95.49%

* Other games combined - includes Caribbean Draw, Caribbean Stud, Sic Bo, European Slot Poker, Pai Gow Poker, Red Dog, Vegas Three Card Rummy, Bingo games, Roulette Multiplayer and War

There were a large enough number of game records to give the RTP calculations sufficient statistical power³. The actual RTPs shown above are percentages of total actual winnings to bets for each game type. iTech Labs has done checks to verify the integrity of the game logs. iTech Labs also maintains a copy of the game logs for verification purposes.

iTech Labs certifies that the RTPs were calculated correctly from the game logs based on the actual bets and winnings and that the actual RTPs are greater than normally required by international gaming jurisdictions.

¹Keno RTP is 106.25% which is statistically significant - iTech Labs has chosen a 95% confidence measure for 'statistical significance'. Based on this measure, statistically significant variations would be expected to appear 5% of the time without indicating any serious problem with RTPs. iTech Labs recommends games with statistically significant variations are reviewed again during the next audit to verify that the same variations are not recurring, which may then indicate a problem.

²Baccarat RTP is 100.04% and Slots RTP is 89.54% - These are not statistically significant. These results are within the 95% confidence limit.

³ The games included in the Other games combined category have insufficient data for the audit period.
