\* Other games combined - includes Craps, European Slot Poker, Keno, Pai Gow Poker, Red Dog, Sic Bo and War.

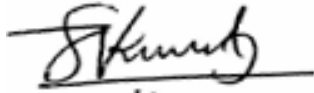

There were a large enough number of game records to give the RTP calculations sufficient statistical power<sup>2</sup>. The actual RTPs shown above are percentages of total actual winnings to bets for each game type. iTech Labs has done checks to verify the integrity of the game logs. iTech Labs also maintains a copy of the game logs for verification purposes.

iTech Labs certifies that the RTPs were calculated correctly from the game logs based on the actual bets and winnings and that the actual RTPs are greater than normally required by international gaming jurisdictions.

<sup>1</sup> iTech Labs has chosen a 95% confidence measure for 'statistical significance'. Based on this measure, statistically significant variations would be expected to appear 5% of the time without indicating any serious problem with RTPs. iTech Labs recommends games with statistically significant variations are reviewed again during the next audit to verify that the same variations are not recurring, which may then indicate a problem.

<sup>2</sup> The games included in the Other games combined category have insufficient data for the audit period.
